合图主机部署

- 下载应用

  - 下载 zip 包 **conthing-hetu-installer-hetu-installer-v1.1.0b3.zip**

- 安装应用

  - 给设备上电，连接网线

  - 用 MobaXterm 连接设备，设备的默认地址是 192.168.0.101

  - 向 / 目录下上传 zip 包

  - shell中解压，解压完成后删除压缩包

    ```
    cd /
    unzip conthing-hetu-installer-xxxxx.zip
    rm conthing-hetu-installer-xxxxx.zip
    ```

  - 重命名成 /app

    ```
    mv hetu-installer-xxxxx/ app
    ```

  - 执行安装脚本

    ```
    cd /app/scripts
    bash ./prepare.sh
    ./install_redis.sh
    ```

```
root@conthing:/# mv lpr-installer-v1.1.5b1/ app
root@conthing:/# cd /app/scripts/
root@conthing:/app/scripts# bash ./prepare.sh
create soft link /app/nginx/log -> /app/log/nginx
ipaddr.sh already in /etc/init.d
ipaddr.sh already in /etc/rc.local
generate frpc.ini
frpc.sh already in /etc/init.d
frpc.sh already in /etc/rc.local
startup.sh already in /etc/rc.local
root@conthing:/app/scripts# ./install_redis.sh
Welcome to the redis service installer
This script will help you easily set up a running redis server

Selected config:
Port          : 6379
Config file   : /app/redis/6379.conf
Log file      : /app/log/redis_6379.log
Data dir      : /app/data/redis/6379
Executable    : /app/redis/bin/redis-server
Cli Executable : /app/redis/bin/redis-cli
Copied /tmp/6379.conf => /etc/init.d/redis_6379
Installing service...
Success!
Starting Redis server...
Installation successful!
root@conthing:/app/scripts# reboot
```

- 重启设备

```
reboot
```

- 重启成功后，用浏览器登录 192.168.0.101 进行冒烟测试
